

Gudong Waterfall

Gudong Waterfall is located 25 kilometers from Guilin, in the Crown Cave Scenic Area in. It is the only one waterfall group formed by underground water (springs) in China.

As a result, the water is very clear and clean. The primitive forest area around the waterfall covers about 1000 acres. The ancient trees grow extremely high, of which the red maple is said to be the most attractive.

The waterfall is the closest waterfall to the city and also a good place for mountain climbers and hikers because of the many mountains around the waterfall.
